### **DETAILED ACTION**

1. The Request for Continued Examination filed 10/30/2007 is acknowledged.

#### ***Claim Rejections - 35 USC § 101***

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

The claimed invention is directed to non-statutory subject matter. The applicant seems to claim dependant claims that are a part of more than one statutory class. For example the applicant claims a "system" in the independent claims with apparatus limitations then provides dependent claims that are a part of method see claims 43-48, say (see MPEP 2106.01). It is suggested that the applicant provide claims that stay within the same statutory class as the independent claim that it depends from, by re-writing the method claims separate or independent from the system/apparatus claims

Also it seems that a human is recited as part of the apparatus (e.g. "trading agents") (see MPEP 2105)
